

Not all remote walk-over-weighing systems are created equal.

Choose the **SUPERIOR DESIGN**, benefits and support of Tru-Test.

Patented 'No foul' platform design

Significantly prolongs load bar life to maintain accurate weights.

Proven design and support

Both hardware & software has been proven on-farm for 10 years, plus expert support from Tru-Test & MiHub Livestock teams.

All cables protected from chewing

Robust design with all cables running within the frame.

Simple, easy to use software

MiHub Livestock lets you track stock to target weights, then filter & send drafts directly to remote WOW system. Plus data connection managed by Tru-Test.

Faster training time and adoption

Weighing platform can be disguised with soil to create a natural walking surface for stock while still protecting the load bar.

Camera as standard

Check water levels in trough, plus peace of mind during training that stock are crossing.

Get the power to weigh, analyse and manage your livestock from wherever you are. Talk to your rural retailer about the Tru-Test Remote WOW System.
