FAQs

Q Can I use the straight Speedy Tagger cartridge in my TurboTagger?

A No, the Speedy Tagger cartridge is specially designed for the Speedy Tagger and isn't interchangeable with the TurboTagger. Both tools are tailored to make tagging straightforward and hassle-free!

Q Can the applicators be used if you are left handed?

A Yes. The Speedy Tagger and TurboTagger can be used if you are right or left handed.

Heatwave® Milk Warmer For Lambs, Kids & Calves

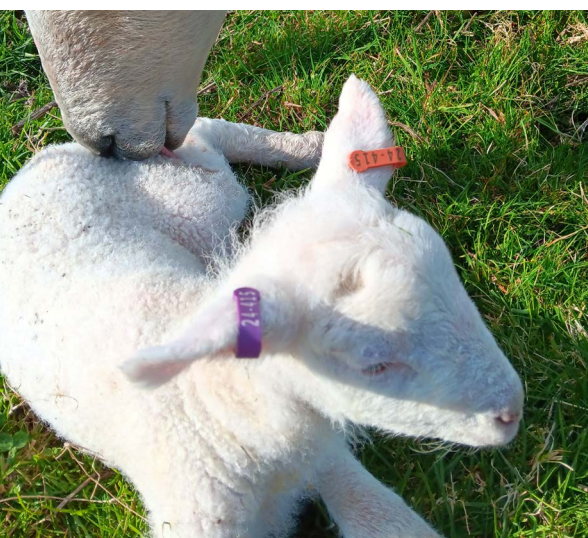

Heats cold milk to be fed on demand

"Takes the hard work out of rearing lambs! No more bottles & late night feeds. Lambs are content as they access milk when they are hungry."

- Feeds up to 50 lambs/kids or 30 calves
- Quick and easy to set up and clean
- Very hygienic, as the milk is stored cold
- Suitable for powdered or whole milk
- Can be set up to feed calves and lambs at the same time

\$1,495 ex GST

“

Shearwell tags last longer on the animal, they are great from a shearer's point of view as they sit nice and close to the ear. Once ordering the tags I was very impressed with the quick arrival and friendly service that I received.

David Buick, Pongaroa

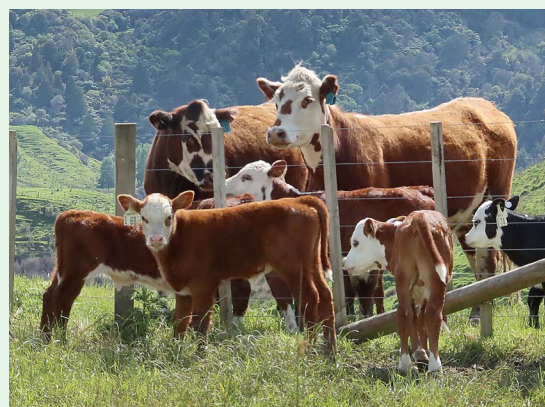

About Us | Shearwell in New Zealand

Shearwell Data is an animal identification and software management business, supporting livestock farmers in New Zealand and around the world.

Since the early 1990s, Shearwell Data has been pioneering livestock identification systems. Our product ranges include sheep and cattle visual and EID tags, EID readers and stock recorders, weighing and drafting equipment.

Shearwell is a family run business that is committed to supporting livestock farmers. Based on a working farm, we test and use the Shearwell products and systems.

In New Zealand, Shearwell is based at our office in Mosgiel. With a wealth of experience, the team are here to help and support customers with enquiries and orders.
